Mission & Values

Our Mission – Creating opportunities and solutions with quality products and exceptional people

Our Values – Profitability the right way... Integrity, Accountability, Excellence

Primary Job Function:

Work random rotating shifts, overtime, weekends, holidays, and call out. Check, observe and operate all equipment associated with the plant processing operation in major equipment systems, fuel systems and mobile equipment. Reports to Operations Shift Supervisor.

Please see below a brief summary job description.

Essential Requirements:

Wear all required safety equipment including but not limited to hardhats, safety glasses, safety harness, ear plugs, dust masks, and gloves

Ascend and descend stairs and ladders, climb up and down, above, inside and under equipment

Able to bend, kneel, twist in confined spaces and awkward positions for extended periods

Lift up to 100 pounds of weight properly, use jack hammer weighing 30 to 90 pounds

Able to shovel, sweep, mop and use a wheelbarrow, pull and push gates, repeatedly lift bricks

No fear of heights up to 460 feet

Able to work in inclement weather

Knowledge, Skills and Abilities:

Able to work random rotating shifts, long periods of time up to 16 hours, overtime, weekends, holidays, evenings, and callout during unscheduled work hours as needed

Able to read, write and communicate clearly for record keeping and documentation

Ability to operate mobile equipment such as: fork truck, dump truck, skid loader – ½ yard, 950 loader – 3yd, 980 loader – 6yd, water truck, raw bay reclaimer, and stackers

Maintain valid driver's license

Duties and Responsibilities:

Check, observe and operate all equipment associated with the plant processing operation in major equipment systems, fuel systems and mobile equipment

Operate production and Central Control Room equipment as directed

Operate fuel systems in the kiln, calciner, and mill areas

Perform equipment changes to switch to back up systems

Operate bin filling systems such as mortar additives, coal, coke, clinker, gypsum, and other commodities included in the production process.

Move stackers and reclaimers from one storage area to another

Perform all aspects of pyro-processing refractory replacement, including the safe operation of brick removal and cleanup

Clean the pyro-processing system utilizing bars, air lances, and powershot equipment
