

Mesa Drive Waterline & Paving Construction Notice

Roadway restrictions with detour routes will be in place beginning 9/22/16. For safety during the waterline installation, the road will be closed to traffic. Residential access and services should use an alternate route to the greatest extent possible. Flaggers will be in place to direct local traffic that have no other means of access except through the construction zone. We understand that in some instances, the detour route may take a little longer, but we appreciate your cooperation so that the work can be installed in a safe and timely manner. Please contact **Jennifer Jack, Public Works Roads Section Manager at 480-362-7747** if you have any questions or concerns.
