

Salt River Fire Department Operating Guidelines

DATA COLLECTION FOR CCR

May 2009

405.03

1 of 1

This SOG is to provide the guidelines that will be followed to provide the data collection process for the Salt River Fire Department in accordance with the CCR protocol.

When a patient meets the criteria for the CCR protocol which is an adult non traumatic cardiac arrest the EMS personnel for the fire department shall document that the CCR protocol was followed and notify the EMS battalion chief of the event.

The EMS battalion chief shall review all documentation of the event. The EMS battalion chief shall then provide the documentation to the Salt River Fire Department Medical Director for final review.

In accordance with the guidelines established by the Salt River Community Manager no patient names shall be released to Arizona Department of Health Services but the Salt River Fire Department's Medical Director shall match the information with the patient's information at the receiving facility to provide the necessary information for the Salt River Fire Department to be an active participant in the SHARE program.
