

# Public Works Department Trash/Recycle Placement Tips

- 1** Place your container(s) at the roadside, no later than 6:00am, with wheels against the curb if there is one or just off the roadway on the shoulder
- 2** There should be at least 3 feet between containers and structures such as mail boxes, cars and bulk trash
- 3** Face the front of the container towards the street
- 4** Position the container on a surface as level as possible, away from overhanging obstacles such as tree branches and power lines
- 5** Make sure garbage is bagged and the lid(s) are closed

**Place your bins carefully & leave space on all sides!**

## Why does it matter?

All collection trucks are automated with an electronic arm that grabs and empties the bin. This efficient process streamlines collection and prevents work-related injuries.

- The Solid Waste Section will not service any container(s) not issued by the Community.
- Bagged trash placed outside of containers will not be picked up until the next scheduled service day after it has been placed in the container.
- Remove containers from street after being serviced.
- On rainy days, some homes located on unpaved roads will not be serviced due to road conditions. These containers will be serviced when the roads become drivable.
