Publication Date: May 2021

Overview of the EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. The Small Business Liability Relief and Brownfields Revitalization Act of 2002, as amended by the Brownfields Utilization, Investment and Local Development Act of 2018, was passed to help states and communities around the country clean up and revitalize brownfield sites. Under this law, EPA provides financial assistance to eligible applicants through five competitive grant programs: Multipurpose Grants, Assessment Grants, Revolving Loan Fund Grants, Cleanup Grants, and Environmental Workforce Development and Job Training Grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Multipurpose Grant

\$800,000

EPA has selected the Salt River Pima-Maricopa Indian Community for a Brownfields Multipurpose Grant. Grant funds will be used to conduct Phase II site assessments and clean up the Roadrunner Lake Resort (RLR) Trailer Park priority site. The RLR site is a 40-acre brownfield within the Salt River District target area. The site functioned as a trailer park for over 50 years until the expiration of its lease in 2019. The site contains abandoned trailers, dilapidated structures, and a man-made lake. Contaminants at the site include inorganic contaminants and heavy metals. Grant funds also will be used to prioritize additional brownfield sites and conduct community involvement activities.

For further information, including specific grant contacts, additional grant information, brownfields news and events, and publications and links, visit the EPA Brownfields Web site (<http://www.epa.gov/brownfields>).

The information presented in this fact sheet comes from the grant application; EPA cannot attest to the accuracy of the information. The cooperative agreement is negotiated after the selection announcement. Therefore, the funding amount and activities described in this fact sheet are subject to change.
