Understanding the SRPMIC Brownfields Program
Brownfields are properties that might have harmful substances, making it hard to reuse or rebuild on them. The SRPMIC Brownfields Program works to clean up, assess and investigate these sites to make them safe again. This helps protect our environment and health. It also allows us to create places for new developments, helping our community grow. The three sites that this outreach effort is focused on are the Old Feedlot, Roadrunner Lake Resort Mobile Park and the Cypress Landfill.
Learn more about our efforts and how you can get involved-
SRPMIC Brownfields Program Overview:
